DECO INLET VALVE

METAL COATED INLET VALVES

Exclusive to Premier Clean the Deco Range of Valves. The Deco Valves collection comes in a wide range of colours to suit most colour schemes

VACUSWEEP / VACPAN

Throw away your dustpan and replace it with your ducted vacuum. A Vacusweep or Vacpan inlet is easily installed into your new or existing homes kitchen/bathrooms. It is flush mounted to your cabinet kickboard, making it convenient and discreet. No on/off switch- simply lift the foot switch to turn it on, sweep the dirt towards the vacuum powered inlet and the dust is whisked away back to the central system. Then use your foot to close the point off. No more dust pans!

Available in White, Almond or Black. Stainless Steel faceplates available for Vacpans.

Vacusweeps available in Silver.

ACCESSORIES

DUCTED VACUUM SYSTEMS

Our systems are the most convenient, efficient modern method for cleaning every corner of your home. The power unit is located outside the living area in the garage or on an external wall of the home. Your system is so quiet you can use it without disturbing your baby or families TV enjoyment.

Simply insert the lightweight hose into the wall or floor inlets, located conveniently throughout your home. No more loose plugs or tripping over tangled electrical cords. No recirculated dust or dirt, dust and odours are whisked away and exhausted harmlessly outside the living areas and back to the power unit.

A **Premier Clean Ducted Vacuum System** costs little more than ordinary vacuum cleaners, they are so much easier for you to use and healthier for your families environment.

DUST MITES - ASTHMA - HAYFEVER

Dust mites are a significant cause of allergic reactions associated with Asthma, Sinusitis, Hayfever, Eczema, Skin Disorders and Eye Infections. All of these can be associated with using conventional vacuum cleaners, infrequent emptying of vacuum cleaner bags & poor cleaning, amongst other things.

A **Premier Clean Ducted Vacuum System** allows for easy dust removal. The dust does not actually recirculate back into the home whilst vacuuming, which can happen when using conventional portable vacuum cleaners.

The **Premier Clean Ducted Vacuum System** utilises an external dust collection point that requires only infrequent emptying and eliminates re-circulation of allergens into the home.

- Bag or Bagless
- 2 Speeds (low/high) Switch on/off handle hose optional
- Soft start for longer Motor Life
- Secondary Filter standard in all units
- Bagless System comes with an adaptor for the option to change unit to bag system at any time

DOUBLE LINER BAGS VAC BAGS

Premier Clean Ducted Vacuum Systems use special double liner filter bags which further prevent the risk of dust and other allergens being spread from the unit. In using vacuum cleaners which do not have allergen trapping features, it has been found that they have had little effect in reducing mites in carpets. Our bags capture particles as small as 0.1 micron and have filtration to 99.7%. A standard home uses only 2-3 bags per year.
